Subject: Lextron - inventory float

Trevor,

Reference our phone conversation. When you determine the required amount of time it will take to PPAP the follow part numbers at the new source, please let me know because I need the data to determine the amount of "float" I will need to schedule based on the current usage.

15336479
15317836
12186999
15324884
12191275

Our standard practice, when moving business/tools from one source to another is - have the existing source build a 3 week bank of inventory before we move. The direction is not to use the standard practice?

thanks
